Thanks and Be well,
Tasha

For the business case for RxIntegrity Group

Background

The DEA has alleged that Walgreens suspicious order monitoring program for controlled substances is inadequate and has taken aggressive enforcements actions against 3 Florida pharmacies and the Jupiter Distribution Center. In addition to the actions against their registrations, DEA is demanding civil penalties, potentially totaling hundreds of millions of dollars. The DEA has confirmed that additional regulatory actions are pending against other Walgreen facilities, due to the issues uncovered in their current investigation.

In response, the Company has enhanced its suspicious order monitoring program for controlled substances in an effort to convince DEA that the proposed penalty is excessive and that our new processes will ensure that similar incidents do not recur.

The updated suspicious order monitoring (SOM) program is currently being piloted. Once turned on for all controlled medications nationwide, it is expected to generate thousands of "orders of interest" per week. These "orders of Interest" will all require review prior to allowing the drugs to be shipped to our pharmacies. Without adequate resources to review these orders, the program will not have the necessary impact. The DEA would view this as further failures of our internal processes, which could potentially result in additional pharmacies and distribution centers being subjected to regulatory actions and ultimately prohibited from handling controlled substances. In addition, without the additional resources to timely review the "orders of interest", shipments of controlled substances to our pharmacies will be delayed or held, further negatively impacting the business.

Work that needs to be done

The SOM system has been turned on to "tracking" for the chain for all controlled substances, per the chart below, for last week we had 14,000 items that the stores ordered across the chain that would have to be investigated.

Controlled Substance Reporting

Chain

Sched		Description	Order Items Flagged		By Reason Code			Store Manually Chg Order		System Reduced O

	Other	1298	1	1107	0	0	205	1124	87%	1090	0	1090

Orders that were cut

For the 17 items we have turned on, we generated 470 orders where store's inventory for the drug was cut to zero and these orders need to be investigated before we can potentially put more product into the store.

Controlled Substance Reporting

Chain

Operation		Name	≥100%		91-99%		76-90%		50-75%	
			Items	Stores	Items	Stores	Items	Stores	Items	Stores

1	WESTERN		15	121	15	188	17	222	17	735
4	MIDWEST		15	103	15	161	16	198	17	744

Proposal

I am requesting that the full team compliment, which includes a manager for each division as well as 2 analysts under each manager, a total of 12 headcount, be approved immediately. We originally thought that 2 managers and 2 BAs would get us started and then we would slowly ramp up over the next year or two. We see now that this is not going to be enough to handle the amount of work that needs to be done. Each order of interest has to be investigated before more product can be added to the store.
